Unexpected Interception...

Do not let that Know-It-All fool you… She has been running

I will be watching you to ensure your assessments meet the

You may proceed to Kelly M.’s workspace.

And remember: question everything (except me, obviously).

Episode 1

I just told her- ‘Create a dazzling presentation about Mike’s Motivation Plan that will WOW our HQ.’
And she did!! In like 10 seconds! Check it out!

After reviewing what this Know-It-All AI has generated for Kelly M., I have created a simple framework that even humans can remember.

Revise
Reject
Release

Will Kelly M. need to **revise** the presentation?

Will she need to **reject** any nonsense that KIAA spewed?

Or is she safe to **release** that Know-It-All's concoction into our precious office?

We shall put your skill of scrutiny to the test, QC.

Mike's Motivation Plan

Motivating Employees: What Really Works?

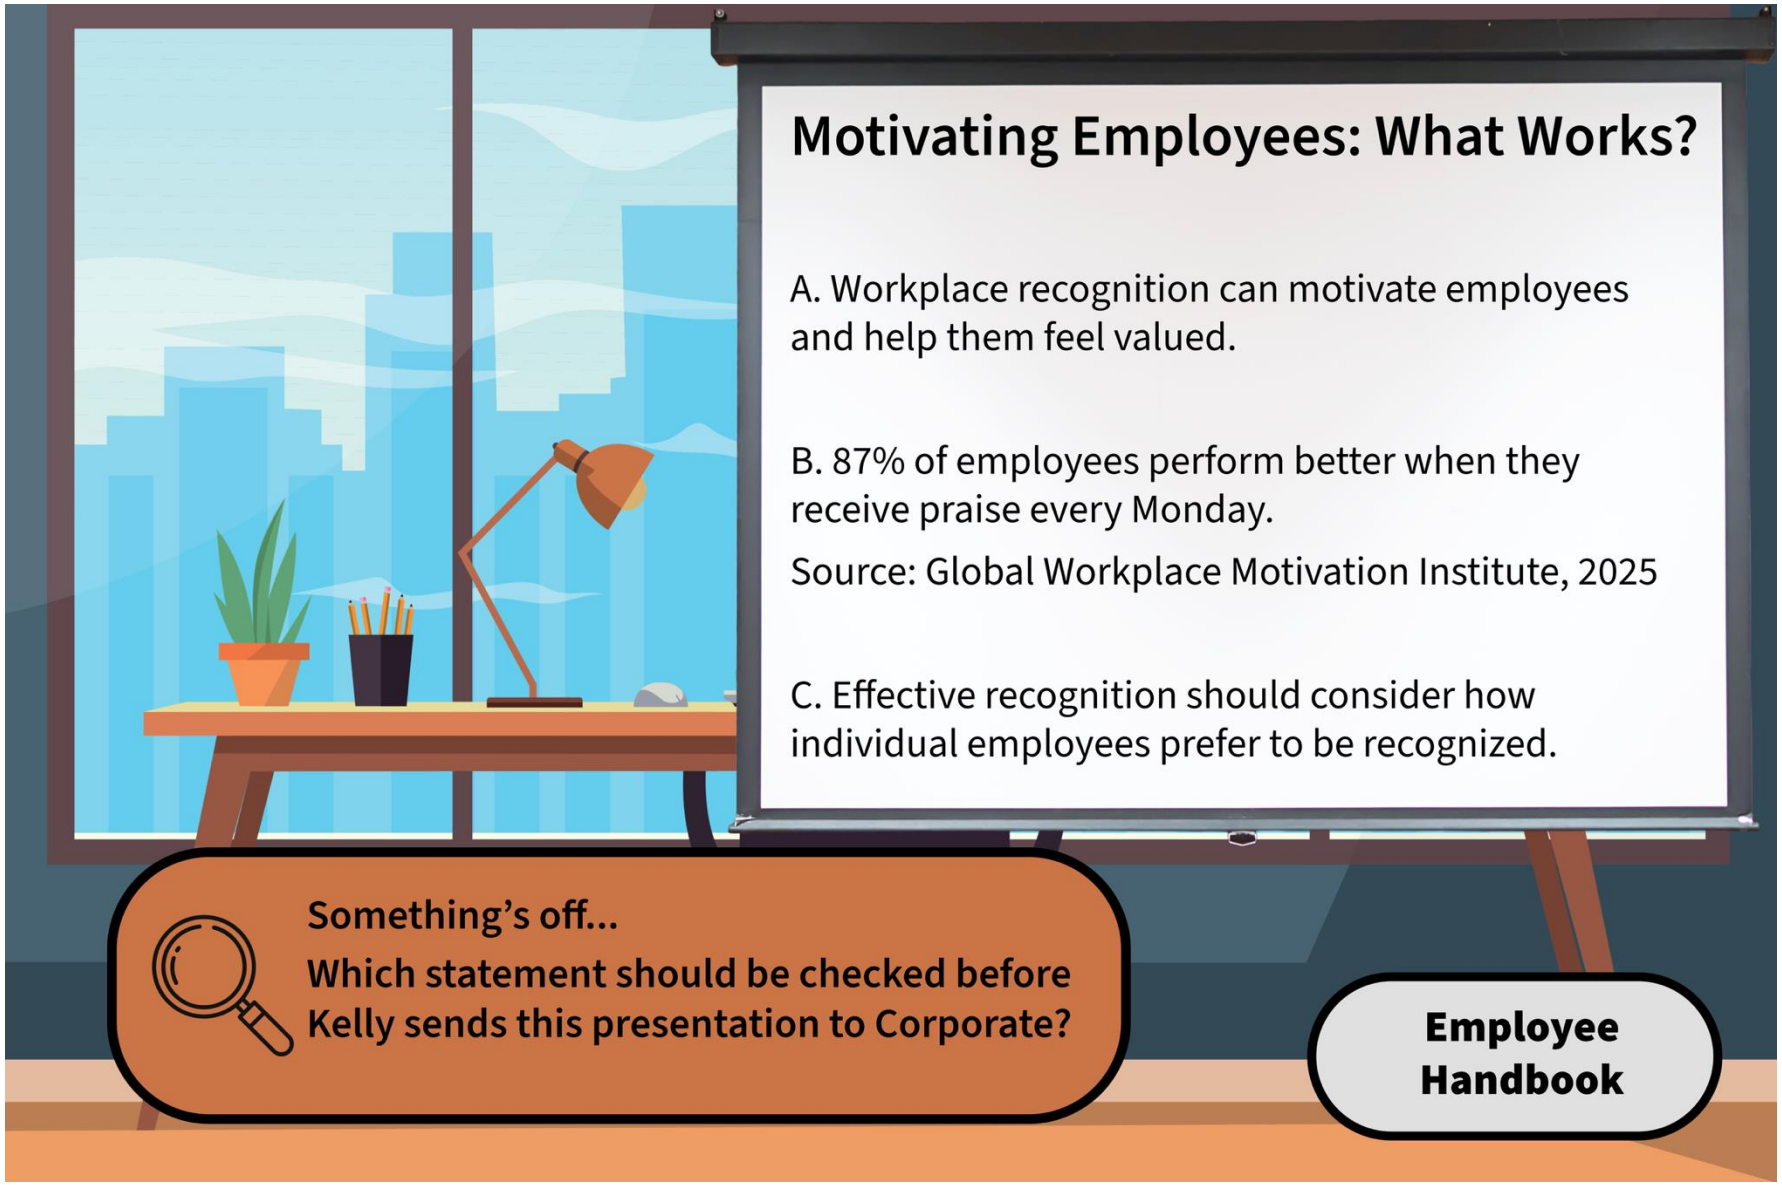

- Workplace recognitions motivate employees and help them feel valued.
- 87% of employees perform better when they receive praise every Monday.
  Source: Global Workplace Motivation Institute, 2025
- Effective recognition should consider how individual employees prefer to be recognized.

Recognize, Reward, Repeat

By: Kelly M.

Find the Hallucination

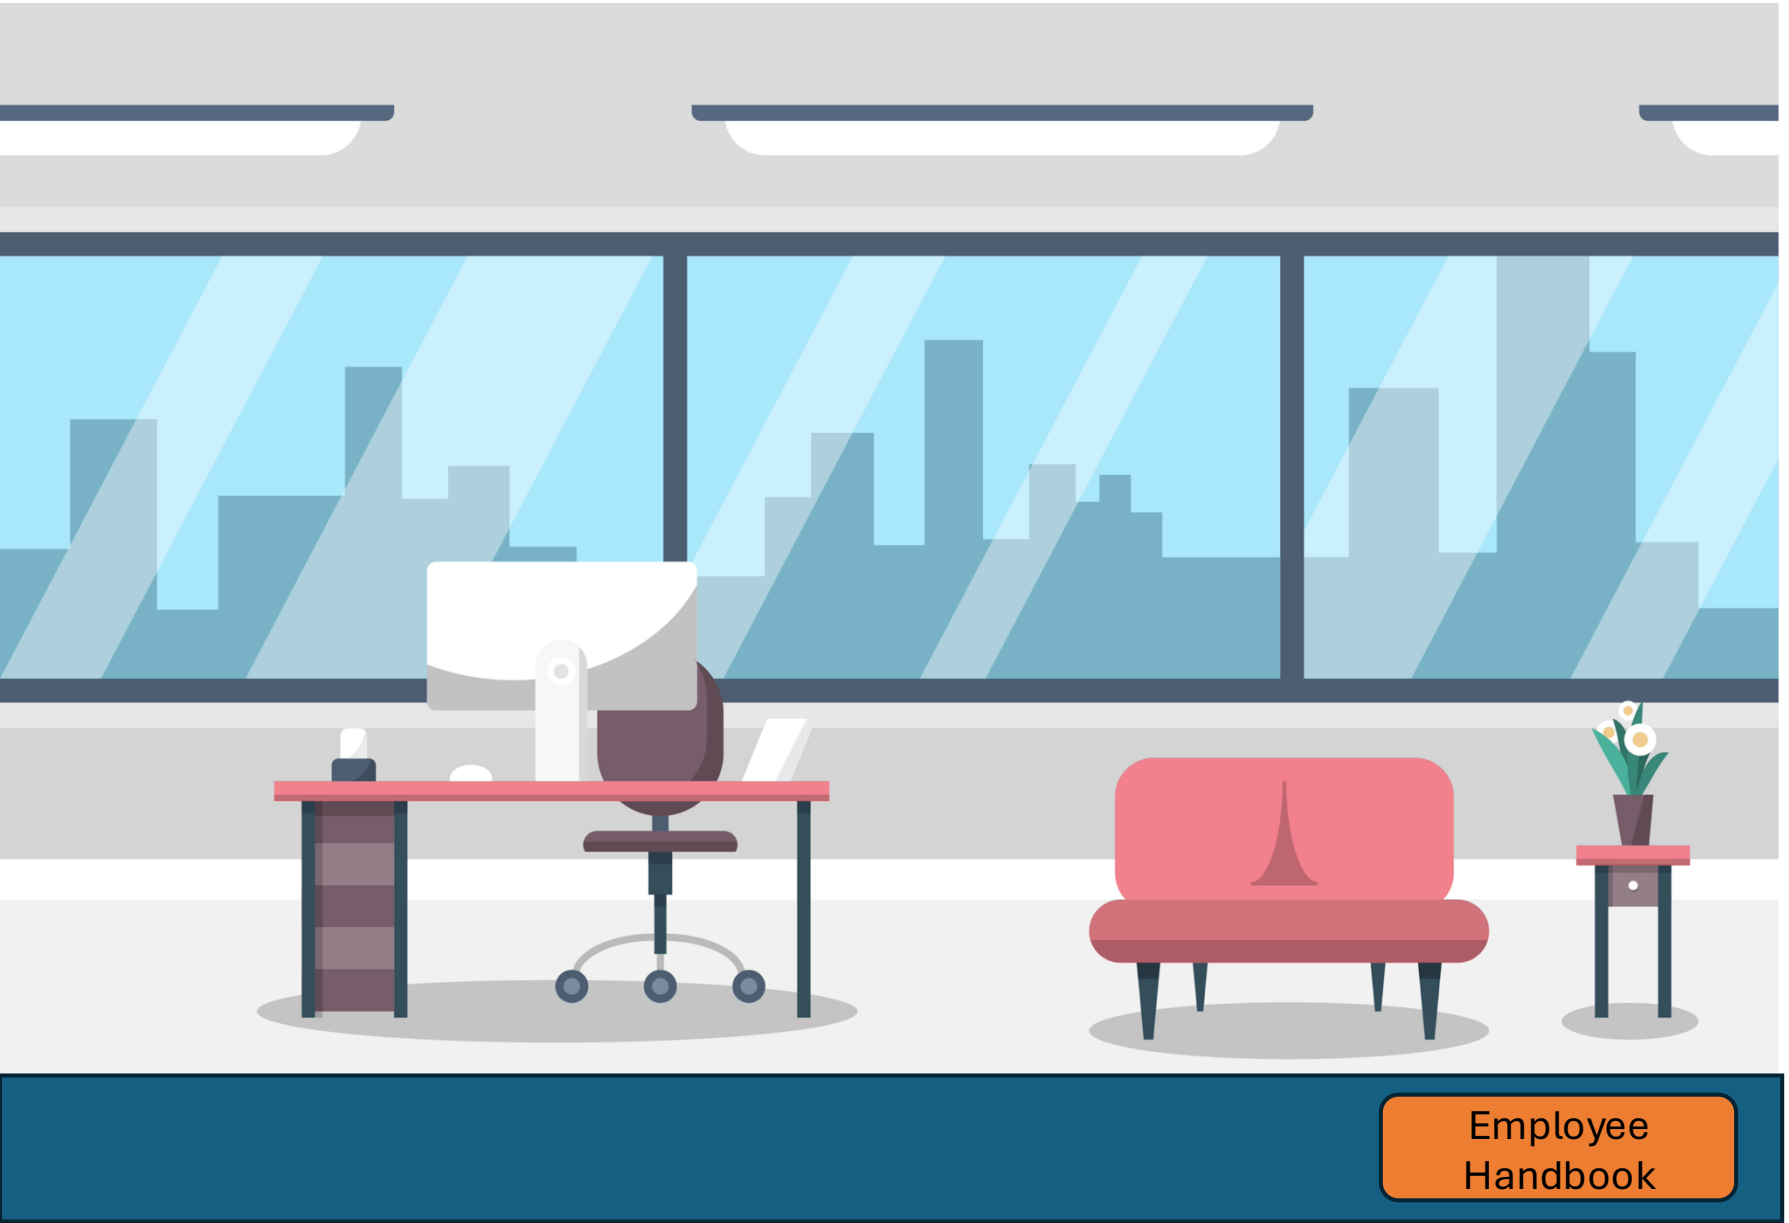

Learner reviews Kelly's presentation and identifies the AI-generated claim that may be inaccurate or fabricated.

The Employee Handbook

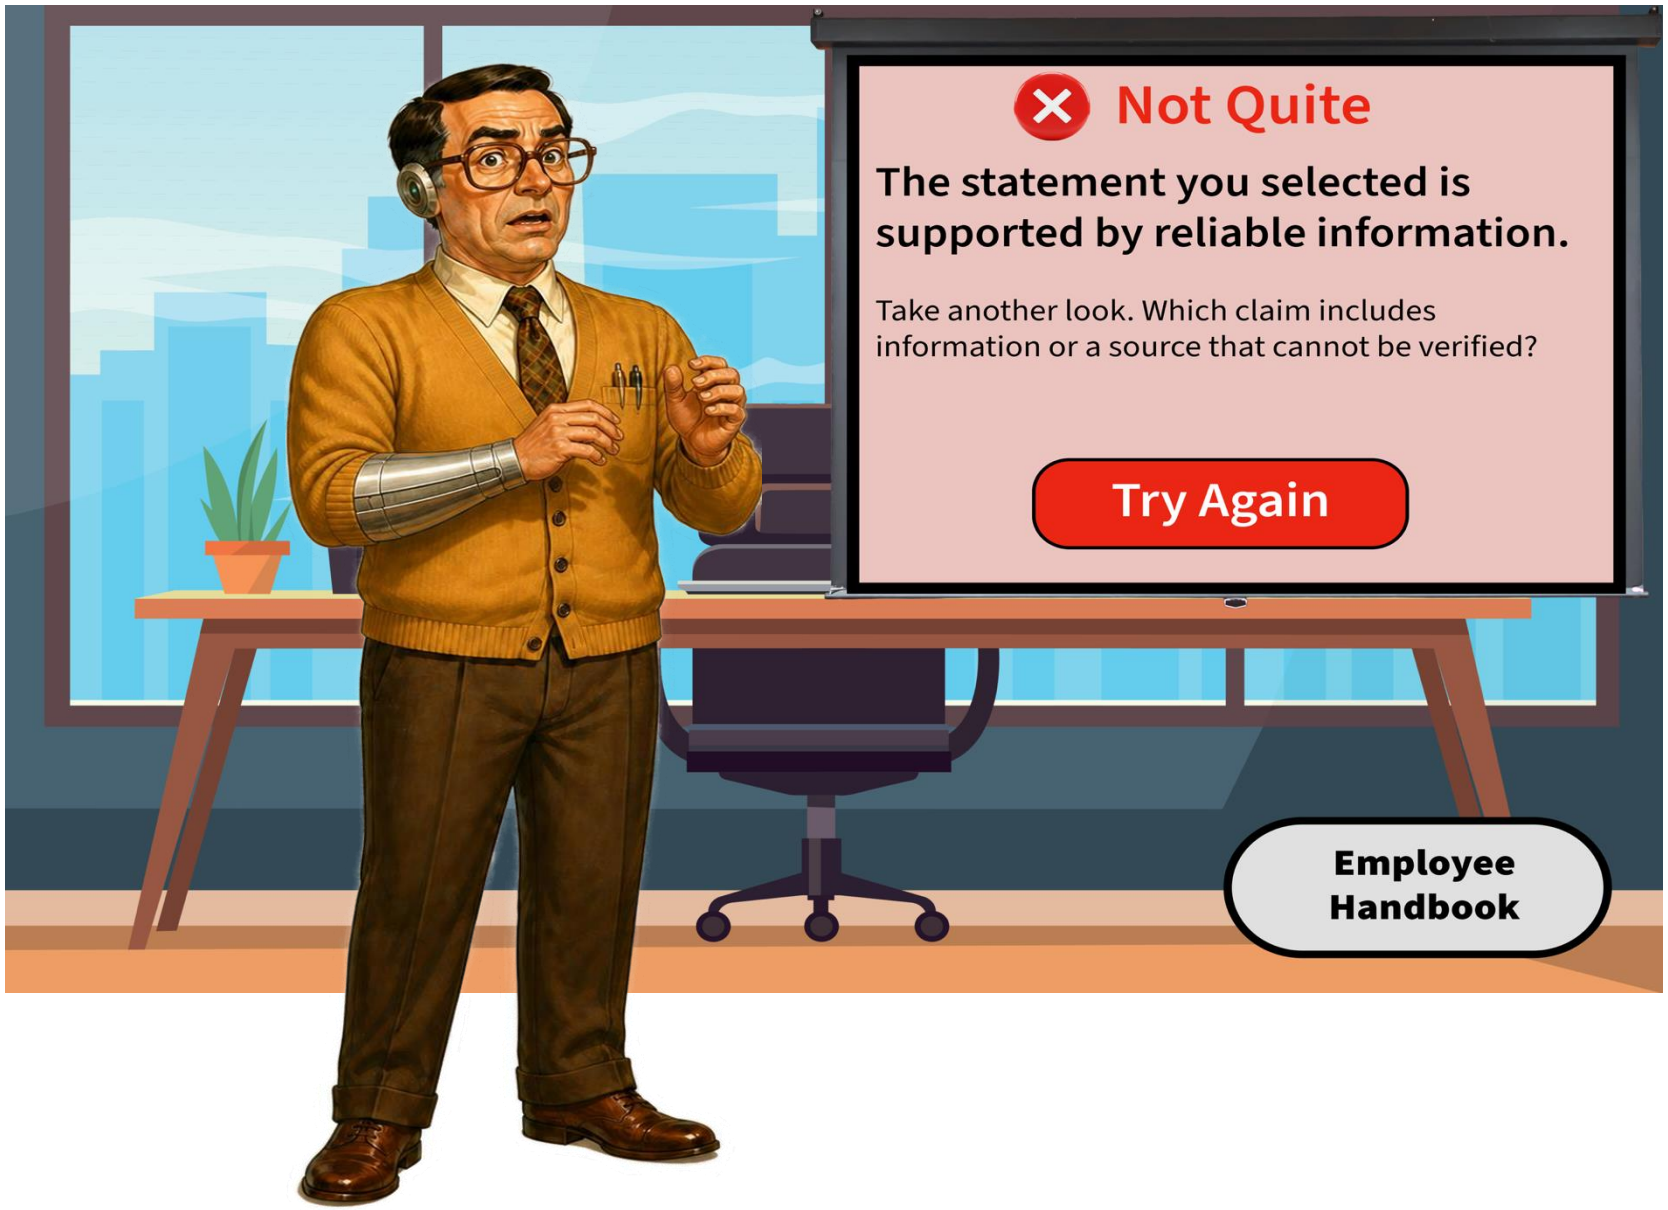

The Employee Handbook will be introduced in the beginning of the learning module by Dwightbot. This artifact will contain the introductory AI information and vocabulary for learners that they will need to complete the scenarios. Users will navigate the information in the book with a menu option. Users will be able to access the handbook to refer to the information during the episodes.

The Employee Handbook

Learners will be able to navigate to the employee handbook during each episode by clicking on the "Employee Handbook" button.

Incorrect Answer Result

Incorrect feedback prompts the learner to review the evidence and try again before the information is sent, or it will move forward with the disastrous consequences.

Correct Answer Result

Correct feedback explains the hallucination and shows that the unsupported claim should be rejected.
